MEIKO
The clean solution

TOPIC

Perfect and cost-effective for healthcare facilities

TOPIC product range

TOPIC

Suitable for every sluice room

The new MEIKO TOPIC is the perfect and cost-effective MEIKO cleaning and disinfection appliance to meet the hygiene requirements of patient utensils in care facilities.

Depending on the situation in the building, MEIKO TOPIC appliances can be supplied for wall-mounting so that they are clear of the floor or for installation directly on the floor. And as care units complete with everything that is necessary and beneficial, TOPIC stand-alone appliances are specially designed for the rapid and uncomplicated replacement of out-dated cleaning and disinfection technology.

They are modified to fit into the position of the old appliance whatever the make of the original – and to use the same connections.

We will work with you to develop an ergonomic sluice room design which meets the most stringent demands of cost-effectiveness, optimisation of work processes, safety in the work-place and hygiene. In this way you will receive your own solution customised to meet the hygiene standards you require.

TOPIC cleaning and disinfection appliances

MEIKO
The clean solution

TOPIC 10
For the clear-of-the-floor wall mounting
