Note: RD signifies roller doors included.

Note: Hot food display bars are suitable for short term food display. They are not a suitable substitute for a chicken humidifier.

They are also designed to accommodate pans available from Roband Australia. Although other brands of pans may fit, this is not guaranteed due to variations in other manufacturers' pans. Hot food display bars are designed to be served around and not over. If units are to be used in a serve over capacity, protection from hot surfaces will need to be considered.
