

GO CASHLESS

It's nothing new that society is moving away from the use of cash. Give your customers an improved laundry experience, while at the same time increase your revenue with a Cashless System from Total Commercial Equipment. Choose from our ePay or Tap & Start systems.

1 ePay

Your customers will enjoy using the trusted PayPal payment gateway on their smart phone with the ePay cashless system. Payments can be made using a PayPal account or with a VISA, MasterCard or AMEX card. No apps need to be downloaded and no accounts need to be created ... it's that simple. Plus with the ePay system you can keep your machines coin operated as well!

- operates on all models of Primus washers and dryers
- simple to install yourself, without the need for a technician (a suitable modem is required in-store)
- to use, customers simply scan the QR code (supplied) or enter your personalised payment website (this link can feature on your store website to increase traffic)
- payment website is customisable to your branding
- you can quickly start a machine for a customer from your smart phone, from anywhere in the world
- vend price is easily changed at any time, free of charge
- email confirmation provided to both yourself and your customer for each transaction (plus weekly reports)
- payments are received once per week to your account
- low investment cost, with minimal ongoing management fees (customers pay the transaction fee)

2 Tap & Start

It doesn't get much easier than PayWave Tap & Start. Just like an EFTPOS purchase in a retail store, your customers simply tap their VISA or MasterCard onto the contactless reader, or swipe their card. Once the payment is approved the machine will be ready to start.

- can be installed by Total Commercial Equipment on all models of Primus washers and dryers
- when only a 3G network connection is available, an internal router can be installed (can operate with WI-FI if a suitable modem is available within range)
- simple and safe for both customers and yourself
- you can quickly start a machine for a customer from your smart phone, from anywhere in the world
- a completely cash-free system so no collecting and counting
- with no cash, in-store risks such as vandalism and robbery are heavily reduced (possibly reducing business insurance costs)
- vend price is easily changed at any time, free of charge
- payments are received once per week to your account
- reports provided
- low investment cost, with minimal ongoing management fees (customers pay the transaction fee)
