MASTERING THE ELEMENTS

Display Series

DESIGNED AND ENGINEERED IN AUSTRALIA TO MEET AUSTRALIAN STANDARDS

Freestanding Refrigerated

The Airex Freestanding Refrigerated Display Series has been specifically designed to display cakes and pastisseries to the highest food safety standards with its adjustable digital temperature control.

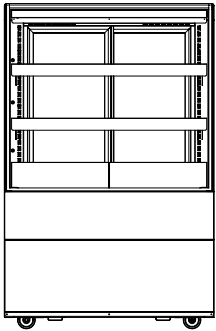

Integrating a winning combination of double-glazed heated and frameless glass construction, all Airex display cabinets provide exceptional display with minimal condensation. A uniquely designed vertical integrated low volume airflow system delivers cool air to each shelf, that reduces drying of products and extends the shelf life of merchandise. The range is equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

Perfectly matching the Heated and Ambient Series, these versatile refrigerated display cabinets provide hassle free cleaning with removable shelves and condenser filter and is fitted with heavy duty castors for easy maneuverability.

Freestanding Ambient

The Airex Freestanding Ambient Display Series has been specifically designed for controlled ambient temperatures and are perfectly suited for the display of a variety of breads, pastries and cakes where temperature is not a concern, but retention of quality is.

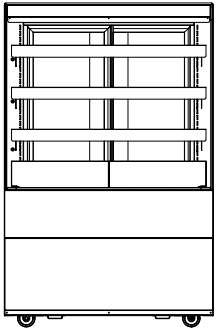

Each unit is supplied with an adjustable digital temperature control, single glazed frameless glass construction and energy efficient LED lighting for increased product visibility and exceptional display. The range is equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

Perfectly matching the Refrigerated and Heated Series, these versatile Ambient display cabinets provide hassle free cleaning with removable shelves and condenser filter and is fitted with heavy duty castors for easy maneuverability.

Freestanding Heated

The Airex Freestanding Heated Display Series is equipped with an energy efficient fan forced heating system specifically designed to provide safe, excellent temperature control and humidity for pies, pasties and pastries with even air distribution throughout the cabinet to maintain product at the highest quality.

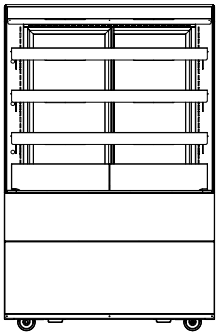

Designed with innovation in mind, each unit is supplied with a concealed water well positioned for hot air to be passed over, introducing humidity into the display, holding products fresher for longer. A winning combination of single glazed frameless glass construction, adjustable digital temperature control and warm LED lighting to each shelf highlights product visibility and outstanding presentation.

Perfectly matching the Refrigerated and Ambient Series these versatile Heated display cabinets provide hassle free cleaning with removable shelves and is fitted with heavy duty castors for easy maneuverability.

Countertop Displays

The Airex Countertop Display Series encompasses both Heated and Refrigerated Displays, ideal for areas where floor space is at a premium. Both models feature an adjustable digital temperature control, LED lighting, sliding doors to rear and frameless glass construction for outstanding display.

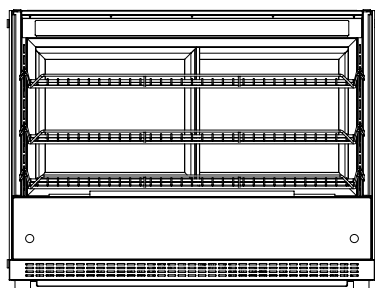

Countertop Refrigerated Displays feature double glazed heated glass to minimise condensation whilst simultaneously maintaining consistent temperature and keeping products looking fresher for longer. The display is also equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

The Heated Display, specifically designed to provide safe, excellent temperature control features a water pan as standard to introduce humidity into the display and is positioned for easy access and maintenance.

Refrigerators & Freezers

Airex Undercounter Refrigerators can be supplied with either solid or glass doors while the undercounter Freezer offers solid doors. The range presents 600mm depth and 840mm height, making it ideal for compact or worktop applications. The range is equipped with an adjustable temperature control, environmentally friendly R600a Hydrocarbon refrigerant, two adjustable shelves and a protective coating on the refrigeration coil to help prevent corrosion. CFC free polyurethane insulation provides both structural support and thermal performance efficiency to reduce energy usage across the entire lineup.

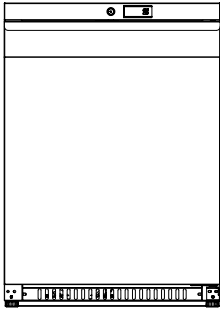

Glass door refrigerators feature a lockable double-glazed heated door to provide exceptional display while minimising condensation.

Solid door refrigerators feature a lockable and reversible door to provide adaptability and ensure each unit will fit perfectly into every location.
