

WASHTECH[®]

PROFESSIONAL WASH SYSTEMS

WASHTECH

MOFFAT[®]

LOCAL EVOLUTION

All Washtech dishwashers are designed and manufactured locally, for local businesses, to specifically meet Australasian conditions, regulations and customer expectations.

The company was originally founded as Wash Systems Limited in 1981 by Des and Gary Brent in Auckland, New Zealand.

After spotting a new opportunity they released their first machine, an undercounter dishwasher built in Des' single car garage, branded Starline. Subsequently the product range was extended to include glasswashers, all types of commercial dishwashers, potwashers, rack conveyors and industrial washing machines.

In 1989 they entered the Australian market with the new Washtech brand. A base in Brisbane was established from which to distribute. In 1993 Washtech gained ISO 9001 certification, which it has maintained ever since.

Now, as the largest manufacturer of professional wash equipment in Australasia, Washtech can proudly look back on decades of building robust, efficient and reliable equipment.

A-TYPE
PREMIUM RANGE

The Washtech Premium Range represents the most technologically advanced dishwashers in the Washtech line up. They are built to deliver optimal wash results and operating environment through the incorporation of the latest advancements in dishwashing technology – without compromising the durability, reliability and longevity Washtech is renowned for.

Heavy Duty Stainless Steel Construction and Componentry ensures long term durability and reliability and an extended useful life for the glasswasher or dishwasher.

Full Insulation reduces operational noise and provide a cooler operating environment.

Polish Free Compatible Assured Rinse with 316 stainless steel break tank and rinse booster pump ensuring consistent rinse temperature and pressure every cycle.

Advanced Electronic Controls provide easy and full control over all functions including chemical injection settings, along with intuitive customisable reminders once cleaning or servicing of the machine is required.

Soft Start gradually pressures the wash system to minimise breakages.

Hot rinse retention improves energy efficiency through draining the colder dirtier wash water at the base of the tank.

Hands-Free AutoDrain with enhanced filtration avoids the need for an upstand with the drain / self cleaning cycle easily activated via the electronic controls.

Rapid Rinse Recovery (GL and UL) machines can be updated to 3p/15A power for efficient operation even on cold inlet water.

Soft Close Door (GL and UL) ensures a soft, fluid action when opening or closing the doors on the undercounters.

Coloured and Textured Stainless Steel (GL and UL) provides a world first in the use of Rimex coloured and textured stainless steel for the construction of dishwashers. This provides 450+ different options, including Black Mirror.

Highly Efficient Heat Recovery (ALC) system provides significant operating cost savings over conventional passthrough dishwashers with the ALC also certified for installation without an extraction canopy in most locations.

The Washtech Premium Range

	GL / GL Black	UL / UL Black	AL	ALC
Rack size	365 to 450	500	500	500
Cycle times	60,120, 180	60, 120, 180	45, 60, 90	45, 90,120
Power	1p/15A or 3p/25A	1p/15A or 3p/15A	3p/15A	3p/15A
Water per cycle	2.2	2.4	2.4	2.4 (cold)

M-TYPE PROFESSIONAL RANGE

The Washtech Professional Range combines the best of modern technology with an uncompromising use of high quality components and heavy duty stainless steel in their construction. The result is a machine that you can rely on for great wash results for many years to come.

Heavy Duty Stainless Steel Construction throughout the entire machine ensures long term durability and reliability with an expected useful life considerably longer than other machines packed full of plastic components.

Heavy Duty Stainless Steel Componentry ensures the same long term durability and reliability of the wash and rinse arms, scrap trays and remaining elements of the wash system.

Advanced Electronic Controls provide easy and full control over all functions including chemical injection settings, along with intuitive customisable reminders once cleaning or servicing of the machine is required.

Soft Start gradually pressures the wash system to minimise breakages. Self Cleaning operates at the end of every drain cycle, flushing the machine with fresh water prior to powering down.

Quick Connection with all service connections now accessible externally for fast simple installation.

Polish Free Compatible Assured Rinse (M1C, M2 and M2C) with 316 stainless steel break tank and rinse booster pump ensuring consistent rinse temperature and pressure every cycle.

Multiple Power Options (M1C and M2) enables simple connection to either 1p or 3p power supply depending on the desired recovery time between cycles and power availability.

Highly Efficient Heat Recovery (M1C and M2C) provides significant operating cost savings over conventional passthrough dishwashers while making the machines suitable and certified for installation without an extraction canopy in most locations.

The Washtech Professional Range

	GM	UD	M1C	M2	M2C
Rack size	365 to 450	500	450	500	500
Cycle times	60,120, 180	60, 120, 180	60, 120, 180	60, 120, 180	60, 120, 180
Power	1p/15A	1p/15A	3p/15A or 1p/15A	3p/15A or 1p/15A	3p/15A
Water per cycle	2.2	2.2	2.4 (cold)	2.4	2.6 (cold)

POLISH-FREE GLASSWASHING

Washtech has worked with local leaders in water purification and chemical fields to develop a range of effective and highly productive polish-free glasswashing systems.

By focusing on polish-free glasswashing capacity, these systems are designed to keep up with the operational requirements while providing cost savings through reduced labour requirements and glass breakages, improved health and safety, and a consistent high quality finish for all glassware (and cutlery).

Your staff no longer wash glasses manually, so why are they still polishing them by hand?

Polish-Free Glasswashing System

In addition to the optimal glasswasher or dishwasher there are a range of reverse osmosis water filters, optional external storage tanks, suitable chemicals, customisable divided and tilted glass racks all available to build the perfect polish free system for you.

Compatible Undercounter Glasswashers

With two power and size options available, the GL and GL-B are suitable for smaller bars and more compact locations; and the larger UD-R, UL and UL-B are optimal for busier locations. To ensure optimal capacity at these busier sites, we recommend the use of 500mm racks with divisions and tilts, connection of the machines to 3p/15A power and the inclusion of an external polish free water storage tank.

Compatible Passthroughs

A range of options from the compact M1C through to the powerful ALC complete with Heat Recovery Unit and fully insulated hood to reduce noise. Due to the built in heat recovery system and enhanced rinse heating systems, the – C models will provide around double the hourly capacity of a standard unit when each are operating on a cold water supply – making them perfect high capacity polish free glasswashers.

X-TYPE ECONOMY RANGE

The Washtech X-Type represents the continuation of the original range of machines going back to the founding of Washtech in 1981.

Like their predecessors including the older model AL, M2, GM etc. the Economy range is still hand made using heavy duty stainless steel construction methods and featuring highly reliable electromechanical switch gear.

The new models certainly aren't stuck in the past though, with a fresh facelift - including digital gauges and LED lighting, highly versatile and easily customisable electronic timer, and dual externally adjustable chemical pumps - making these great value for money as the perfect hybrid of new technology and old school durability and reliability.

The Washtech X-Type is far from your average economically priced machine. Hand constructed from heavy duty stainless steel and equipped with high end components, these models provide highly efficient and reliable wash results over an extended useful life that mass produced and plastic filled alternatives can only dream of.

Legacy Models. All X-Type models are a continuation from previous series Professional models and retain the high quality running gear that ensures no fuss, high productivity glasswashing and dishwashing.

Heavy Duty Stainless Steel Construction ensuring long term durability and reliability.

Washtech Hybrid Controls feature a combination of IP67 stainless switches, tried-and-tested switchgear and a customisable electronic timer.

Dual externally adjustable chemical injectors are fitted as standard. Drain pumps are also fitted in XG, XV, XU and XM.

Efficient Rinse Recovery. High quality and powered rinse heating elements across the range ensure all power available is utilised to minimise time between cycles (even when connected to 1p/15A) and optimise productivity.

High Capacity Workers. The XP and XL are ideal options for locations requiring a high capacity passthrough dishwasher. Both feature heavy duty stainless steel wash manifolds and scrap trays to provide long term reliability, with the XL also equipped with heavy duty stainless steel wash and rinse arms along with a powerful 1.5HP wash pump that enables a rapid cycle of just 40 seconds.

The Washtech Economy Range

	XG	XV	XU	XM	XP	XL
Rack size	365	365 to 450	500	450	500	500
Cycle times	60	60, 120	60, 120	60, 120, 180	60, 120, 180	45, 60, 90
Power	1p/15A	1p/15A	1p/15A	1p/15A	1p/15A	3p/15A
Water per cycle	1.5	2.2	2.2	2.2	2.2	2.4

PLANET TECHNOLOGY

38% reduction in rinse water heating costs through the new M1C, M2C and ALC when compared with a conventional passthrough dishwasher.

Water consumption of no more than 2.4L per cycle across the range of standard machines.

Approximately 90% of our machines by weight are recyclable at the end of their useful life.

13,200km less distance travelled vs. machines Imported from Europe.

Packaging materials utilise recycled products wherever possible.

W-TYPE WAREWASHERS

Washtech warewashers are the perfect companion for busy main kitchens, butcheries, bakeries, and other heavy duty applications having been specifically designed for the thorough and rapid washing and sanitising of baking trays, bins, bowls and other bulky items.

Heavy Duty Stainless Steel Construction and Componentry

All professional models feature heavy duty stainless steel construction and componentry throughout ensuring long term durability and reliability.

Washtech Hybrid Controls

Washtech hybrid controls feature a combination of IP67 stainless switches, tried-and-tested switchgear, with a customisable electronic timer.

Versatile Machines

The AL8 and PW range are all equipped with break tanks and rinse pumps and can be connected on two different power ratings depending on site requirements. This ensures great results even at sites with water pressure, temperature and/or power challenges.

Clean Perspective

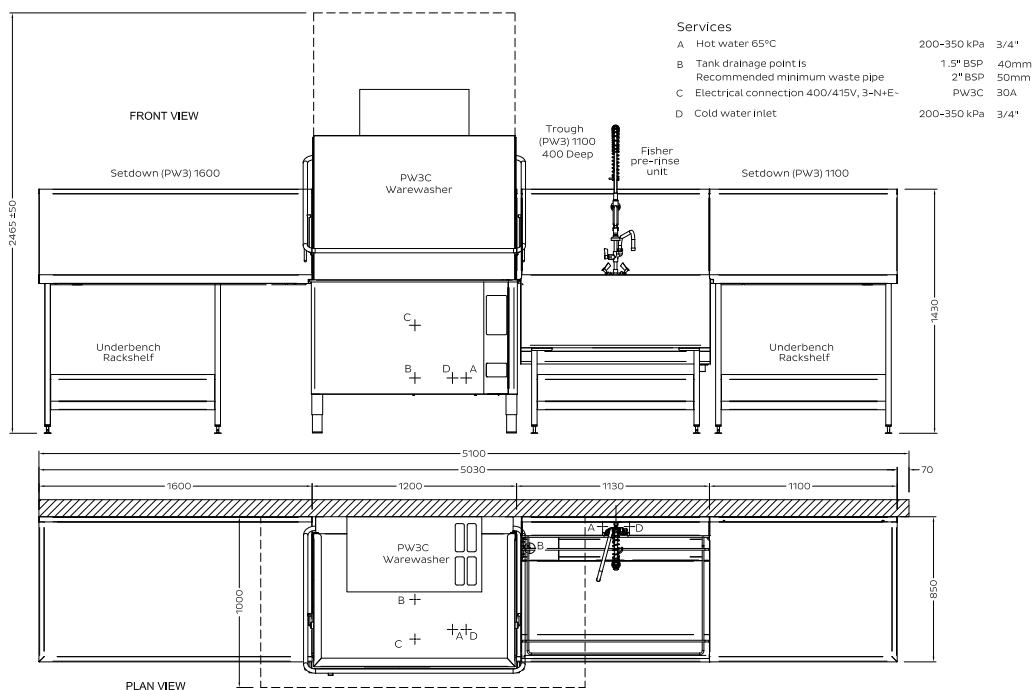

Dual externally adjustable chemical injectors are fitted as standard.

Heat Recovery (Optional)

The AL8, PW1, PW2 and PW3 can all be upgraded to include a highly efficient Heat Recovery Unit.

Warewasher Workstations (Optional)

A full array of customisable benching and troughs are available with each of the warewashers to suit a wide variety of spaces and operations.

C models include integrated Heat Recovery Units. All other features are as per the base model

PLANET TECHNOLOGY

10 Planet Technology models in the Washtech range, operating highly efficient heat recovery systems and running on cold water.

CDe120 provides 40% reduction in rinse water usage vs. average single tank rack conveyor, and corresponding reductions in chemical usage.

The CDe240 washes up to 4,320 plates and equivalents per hour, using as little as 28mL of fresh water per plate washed.

CDe range provide rinse water heating reductions of over 60% when compared to the standard models.

The W-Type and C-Type ranges are constructed from heavy duty stainless steel and are designed to be easy to service and maintain, ensuring an extended useful operating life for all models.

C-TYPE RACK CONVEYERS

Washtech C-type is a comprehensive range of powerful and efficient rack conveyor dishwashers. Washtech rack conveyors are consistent with European DIN standards –where capacities are increased as modules are added, but higher than standard speeds are available on request at no extra charge.

The range is fully modular and machines are configured and assembled to the specific requirements of each client. A wide range of options, listed below, helps deliver the combination of wash, rinse and drying performance, and layout configurations required. Particularly important are the options which help fit a powerful system into a relatively small space. Washtech C-type Rack Conveyers are fully automatic and very easy to use. All incorporate safety features such as door safety switches, door catches, conveyor drive clutch and low level water protection.

Heavy Duty Stainless Steel Wash Arm Cassettes

One piece wash arm cassettes incorporating indented self cleaning jets and removable end plugs are easily removed for fast cleaning.

Heavy Duty Stainless Steel Rinse Arms

Easily removable rinse arms are secured at both ends and can only be replaced in the correct position.

Optimal Hygiene

Rounded corners in all tanks for ease of cleaning.

Full Door Access

Full width counterbalanced door with safety switch and safety catch provides easy access to the wash chamber.

Scrap Trays

Clear access to full width heavy duty stainless scrap trays with large easy to use handles.

Dual Track Stainless Steel Pawl Drives

Heavy duty stainless steel pawl drive systems run down either side of the rack path for smoother operation and open access to the wash tank.

Economiser

Rinse economiser minimises water consumption by allowing rinse only when racks are in the rinse zone.

CDe RACK CONVEYORS

SYSTEM EFFICIENCY

The next generation in rack conveyor technology, the Washtech CDe range has been specifically designed to provide optimal wash performance and operational efficiency while being light on running costs and the environment.

Heat Recovery

Drawing steam from both the entry and exit of the conveyor ensures maximum efficiency from the integrated heat recovery system and minimal steam emissions and operating costs. The net result is a high capacity rack conveyor system suitable and certified for installation in most locations without the need for an extraction canopy.

EcoRinse

Thanks to the dual tank EcoRinse module fitted in all CDe models, the CDe120 and CDe180 operate on just 180L of fresh rinse water per hour, while the CDe240 consumes just 120L per hour. This compounds the operational savings from the heat recovery unit, minimising both water and chemical consumption.

Enhanced Rinse

The EcoRinse module not only enables low water consumption, it also delivers brilliant rinse results through providing all wash ware with a pre-rinse, then two stage EcoRinse recirculating a nominal 200L/minute of recycled rinse water, before completing the process with a short final fresh rinse.

Refined Accessories

The CDe range includes a wide range of accessories to improve the functionality, productivity and the hygiene of the wash room. These include covered side load table and exit corner dryer modules.

Custom Solutions

The system can also extend to include customised accessories and benching to optimise the full space available. With a full inhouse CAD design service available, CDe rack conveyor systems will be designed and constructed specifically for each customer's unique site and requirements.

THERE FOR YOU

You can never plan for every contingency. But you can have the systems in place to make certain that any incident can quickly and expertly be resolved.

That's what we take pride in – the renowned Moffat full service back-up 24 hours a day, 7 days a week.

Our Technical Service Department provides experienced support to our team of trained service personnel in each branch.

Our strategically placed service providers also deliver backup to outlying areas, and a national toll-free number ensures you've got immediate support when and where you need it.
